About
Agile Front-end Developer with foundation in JavaScript, HTML, CSS, and React JS.

- implemented and styled the front-end components that meet the requirements of mocks and fulfill user stories
- creating user interfaces and integrated them into applications.
- building web applications using JavaScript, HTML, CSS, TypeScript, React JS, Material UI
- proficient in APIs requests.
- teamwork, experience working in Agile development following Scrum process.

My educational background includes Masters degrees in Accounting and Auditing, as well as Music Arts, which demonstrates my commitment to continuous learning.

Want to improve and gain:

- experience in web application, web service building.
- improve my self like a scrum master, using agile methodologies and scrum techniques
- E-commerce and Salesforce technologies

Skills

Programming languages currently in use: JavaScript, HTML5, CSS, TypeScript

Frameworks currently in use: ReactJS, NodeJS.

Others currently in use: Material UI, Git, Figma, Bootstrap, Agile, Scrum, Trello.

Programming projects

TodoNote App — I developed the to-do list app with React and used Bootstrap CSS to style components and Figma to design the layout.

Library Web Service — I developed a library management project using React for the user interface and Bootstrap CSS for the user interface design. The creation of this project included the creation of components to display books, the ability to add new books, delete and edit existing records, register new users and authenticate.

Travel ticket online store - Participated in team development web application of travel ticket online store using Agile technology and Scrum process. Used React, Material UI, CSS, .Net.
